

ELECTRICAL RECORD

MONTH	DATE READ	METER READING	KWH USED	AMOUNT OF BILL	DATE PAID
JANUARY					
FEBRUARY					
MARCH					
APRIL					
MAY					
JUNE					
JULY					
AUGUST					
SEPTEMBER					
OCTOBER					
NOVEMBER					
DECEMBER					

Use this chart to keep track of the important information from each month's electric bill. It can provide you with a valuable means of comparing kWh (kilowatt-hours) use from month to month. This, in turn, will assist you in determining the savings you are receiving from any energy-conservation measures you may have taken.

It is important to remember: When comparing one month's bill to another, look at the number of kWh used and the number of days on which the bill is based. The Date Read, Meter Reading, kWh Used, and Amount of Bill, as well as a monthly comparison, can all be found on your statement each month.
